**Exclusively available in your physician's office for provider-guided treatments**

Experience clinical luxury following intradermal treatments, including:

- Hyaluronic acid fillers
- Neuromodulators
- Vitamin complex and mesotherapy
- Growth factors and PRP

**What our doctors have to say about AQUAGOLD® fine touch™**

*"Unlike classic roller techniques that can cause microtears in the skin, this device won't cause bleeding because it applies the microchannel perpendicular to the skin."*

**Joel Schlessinger, MD**  
Board-Certified Dermatologist  
(Omaha, NE)

*"What I like about the Aquagold is that you have the versatility to put whatever content you would like in the chamber to increase penetration into the skin."*

**Nathan Trookman, MD**  
Board-Certified Dermatologist  
(Colorado Springs, CO)

*"This is a very efficient device where a reservoir can be used to introduce substances like HA, botulinum toxin and other substances that may improve skin quality in combination."*

**Steven Fagien, MD**  
Board-Certified Oculoplastic Surgeon  
(Boca Raton, FL)

Painlessly, easily, and effectively delivers treatments with 99.9% pure gold-plated surgical grade stainless steel microchannels, each thinner than a human hair.

*"Superficial microinjections of diluted HA using a new microchannel device appears to provide significant visual improvement in moderate to severe acne scarring and skin quality with no adverse effects."*

Excerpt from Study presented by Erin Gilbert, MD. PhD at South Beach Symposium 2016
